Michigan Medicine – Ann Arbor
Software Developer Senior
Michigan Medicine
Ann Arbor, MI

Dear Hiring Manager,

I'm a Senior Software Engineer looking to apply for the Software Developer Senior position at Michigan Medicine in Ann Arbor. Jamie MacLaren who works at Michigan Medicine passed this open position along to me and for that I'm grateful. I have almost 11 years of professional experience ranging from my early days of being a Business Analyst where I learned to take detailed requirements, to becoming a Developer Team Lead where I guided others through code reviews, sprint reviews, sprint planning and one-on-one feedback sessions. I believe my many years of developing web applications could be very beneficial to your team.

This job opportunity presents a great use of the skills I've already acquired over the years. Specifically with my in-depth experience digging into requirements, and how that often translates into even more questions about user interaction with the interface and data paradigms. I enjoy building web applications that people want to use, balancing both design and function. Much of my experience has been working with JavaScript and TypeScript creating documented modern components in React. What excited me about this opportunity was the mission of this job: helping others in the diabetic community. I have both family and friends that live with type 1 and 2 diabetes and would love to join you in furthering this care quality initiative.

You will see from my enclosed resume that I meet all of the job qualifications and more. I would very much like to discuss this Michigan Medicine job opportunity with you. To schedule an interview, please call me at (810) 922-4133. The best time to reach me is between 9 A.M. and 8 P.M., but you can leave a voice message at any time, and I will return your call.

Thank you for taking the time to review my resume. I look forward to talking with you.

Sincerely,

Robert Pollum
